JGi JAIN DEEMED-TO-BE UNIVERSITY

Foreword

From influences that are global to digital explorations, changing geo-political landscape and future work trends, the world of learning is transforming like never before and we at JAIN (Deemed-to-be University) are here to take the lead. The most integral part of creating a differentiated, high value and joyful learning experience begins with designing future ready curriculum, innovative pedagogies and differentiated assessments and we at the Office of Academics have created a template which will serve as a guideline towards strengthening our academic processes leading to the Board of Studies (BoS).

This Academic construct begins with the Department Industry-Academic Cell (DIAC), which is an essential requirement to strengthen the interface and involvement with Industry, followed by the Department Program Assessment Committee (DPAC) to reinforce the outcome-based education efforts. The Board of Studies plays a vital role in defining academic standards and promoting excellence. The proposed framework is to ensure that this crucial body is further strengthened through consistent practice and we are able to provide and intellectually stimulating and vibrant learning experience to our students.

DEPARTMENT INDUSTRY-ACADEMIA CELL (DIAC)

GUIDELINES

DEPARTMENT INDUSTRY-ACADEMIA CELL (DIAC) – Guidelines

Introduction

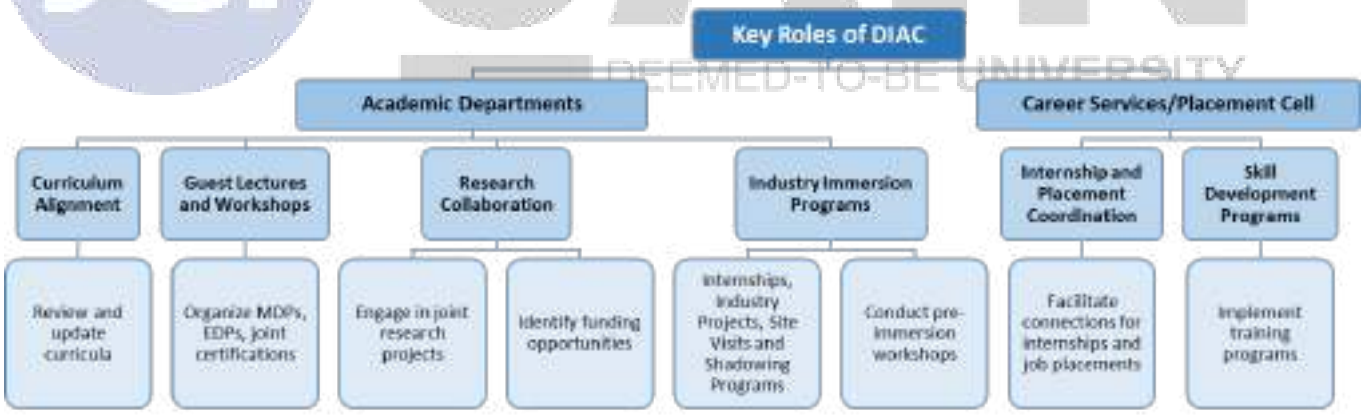
Department Industry-Academia Cell (DIAC) is a collaborative initiative aimed at bridging the gap between departments and industries. These cells foster partnerships to enhance research, innovation, and employability skills among students.

Each Department to set up the DIAC where in Industry personnel could be involved in Department Program Assessment Committee and Board of Studies. Hence, the Department Industry-Academia Cell is to be a precursor to the DPAC and BOS.

I. Key roles of DIAC

The Department Industry-Academia Cell (DIAC) plays a vital role in enhancing the employability of students and fostering a culture of innovation and collaboration.

Figure 1: Key Roles of DIAC



i. Academic Departments

- Curriculum Alignment:
    - Regularly review and update curricula to reflect industry standards and requirements.

- Guest Lectures and Workshops:
    - Organize MDPs, EDPs, joint certifications for capacity building, guest lectures, workshops, and seminars featuring industry experts.
- Research Collaboration:
    - Encourage faculty to engage in joint research projects with industry partners.
    - Assist in identifying funding opportunities for collaborative research projects between faculty and industry.

- Industry Immersion Programs:

  DIAC can create a robust industry immersion program that not only enhances students' educational experiences but also strengthens ties with industry partners.

    - Design Industry Immersion Programs with defined objectives and program types such as Internships, Industry Projects, Site Visits and Shadowing Programs.
    - Conduct pre-immersion workshops to prepare students for their experiences, covering professional etiquette, industry-specific skills, and expectations.

  DIAC to assign coordinators to oversee the logistics, communication, and support for industry immersion initiatives. The Cell also to ensure that it has access to necessary resources such as funding, facilities, and personnel for effective functioning of the industry immersion programs.

ii. Career Services/Placement Cell

- Internship and Placement Coordination:
    - Facilitate connections between students and industry for internships and job placements. This includes organizing job fairs and networking events.
- Skill Development Programs:
    - Work with DIAC to implement training programs that enhance employability skills, such as resume writing, interview preparation, aptitude and soft skills development.

II. Composition of the Department Industry-Academia Cell

Depending on the number of Programs offered by the Department, the DIAC should comprise a minimum of 3 Industry members and a maximum of 10.

Table 1: Composition of the Department Industry-Academia Cell (DIAC)

	Category	Role in DPAC	Number
1	**Dean of Faculty / Director of School***	Chairperson	1
2	**Head of Department**	Co-Chairperson	1
3	**Area Chair / Area Head**	Member	3-8 (Depending on the number of Areas within a Department)
4	**Program Head / Program Coordinator**	Member	3-8 (Depending on the number of Programs offered by the Department)
5	**Senior Non-Teaching Staff** (Academic Administration)	Member	1
6	**Representative of the Office of Academics (OOA) of the University** (To be nominated by CAO)	Internal Invitee	1
7	**Professor**	Internal Invitee	1-3
8	**Associate Professor**	Internal Invitee	1-3
9	**Assistant Professor**	Internal Invitee	1-2
10	**Industry Expert** With adequate, relevant and credible experience in the domain	External Invitee	3-10

JGi JAIN DEEMED-TO-BE UNIVERSITY

	Alumni		
11	Preferably alumni who graduated 5+ years back – which may be relaxed for newer programs	External Invitee	2-3 (Depending on the number of Areas / Programs in the department)

JGi JAIN DEEMED-TO-BE UNIVERSITY

DEPARTMENT PROGRAM ASSESSMENT COMMITTEE (DPAC)

GUIDELINES AND FRAMEWORKS

DEPARTMENT PROGRAM ASSESSMENT COMMITTEE (DPAC) – Guidelines and Frameworks

Introduction

JAIN (Deemed-to-be University) has fully embraced Outcome-Based Education (OBE) to enhance student experiences, improve learning outcomes, and ensure societal impact. The OBE process begins with defining the University's Vision and Mission, and each department must align its own Vision and Mission with the University's overarching goals while reflecting its unique disciplinary needs.

To facilitate this alignment, each department should establish a Department Program Assessment Committee (DPAC). The DPAC will be responsible for developing and/or refining the department's Vision, Mission and also the Program Educational Objectives (PEOs), Program Outcomes (POs), and Program Specific Outcomes (PSOs) of programs offered by the department. The DPAC is also expected to analyze outcome attainments and formulating academic strategies.

This document (PART A) provides guidelines and process flows for forming a DPAC and supporting the development of Vision, Mission, PEOs, POs, and PSOs. PART B, to be shared later, will focus on analyzing outcome attainment and creating academic strategies.

Although OBE was adopted University-wide in 2020-21, some misalignments have been identified in Vision, Mission, PEOs, and POs/PSOs. This document aims to clarify the OBE process and assist departments in formulating and refining their program components.

The DPAC will also serve as a precursor to the Board of Studies and act as a strategic committee for the department.

JAIN DEEMED-TO-BE UNIVERSITY

I. Composition of the Department Program Assessment Committee

A total of fourteen categories have been identified as necessary components of the DPAC (refer Table 1) – and the Chairperson / Co-chairperson is to ensure that each meeting of the DPAC is represented by at least one member / invitee from each category.

The departments with larger number of Programs and / or Areas may expand the DPAC to include up to 40 (members + invitees), while departments offering 1-3 Programs may restrict the number to 20 (members + invitees). The Dean of the faculty shall be the chairperson of the DPAC and the HoD the Co-Chairperson.

Table 1: Composition of the Department Program Assessment Committee (DPAC)

	Category	Role in DPAC	Number
1	**Dean of Faculty / Director of School***	Chairperson	1
2	**Head of Department**	Co-Chairperson	1
3	**Area Chair / Area Head**	Member	3-8 (Depending on the number of Areas within a Department)
4	**Program Head / Program Coordinator**	Member	3-8 (Depending on the number of Programs offered by the Department)
5	**Senior Non-Teaching Staff** (Academic Administration)	Member	1
6	**Representative of the Office of Academics (OOA) of the University** (To be nominated by CAO)	Internal Invitee	1

JGi JAIN DEEMED-TO-BE UNIVERSITY

7	**Current Student** Preferably from the semesters 4 or higher	Internal Invitee	1-5 (Depending on the number of Programs offered by the department)
8	**Professor**	Internal Invitee	1-3
9	**Associate Professor**	Internal Invitee	1-3
10	**Assistant Professor**	Internal Invitee	1-2
11	**Quality Assurance Cell Member**	Internal Invitee	1
12	**Industry Expert** With adequate, relevant and credible experience in the domain	External Invitee	3-8 (Depending on the number of Areas / Programs in the Department)
13	**Alumni** Preferably alumni who graduated 5+ years back – which may be relaxed for newer programs	External Invitee	2-3 (Depending on the number of Areas / Programs in the department)
14	**Parent**	External Invitee	1-2
15	**Academician** Minimum of 15 years of experience in the relevant domain	External Invitee	1-2

** In cases where the Dean of the Faculty position is not occupied, the Directors of the School in which the Department Operates to chair the DPAC*

JGI JAIN DEEMED-TO-BE UNIVERSITY

II. The Functions of the DPAC

The DPAC shall meet twice a year or as required – while one meeting per year is mandate. DPAC performs a staff function with only soft power to deliberate and advise. The functions of the DPAC consist of:

- Periodic review of the educational and social landscape of the department
- Formulation, evaluation, refinement or renewal of the strategic direction of the department, as per contextual requirement, in terms of articulation of Vision, Mission of the department and Program Educational Objectives (PEOs) Program Outcomes (POs) and Program Specific Outcomes (PSOs) for the programs run by the department.
- Periodic reflection and propose course corrections, if required, regarding attainment of Program Outcomes.

III. Vision and Mission Statements for the Department

In this section of the guidelines, we

A) Outline the meaning and importance of Vision and Mission statements
B) Provide a framework to analyze educational and social landscape
C) Propose the process to be followed to:
    a. Formulate Vision and Mission Statements OR
    b. Analyze and refine existing Vision and Mission Statements

A) Vision and Mission Statements – meaning and importance

A ***Vision statement*** is a forward-looking declaration that clarifies your department's purpose and meaning for all stakeholders.

It is crucial because it provides direction for all departmental actions. **Every goal and action is designed with the intent of achieving this Vision, guiding all decisions made by the department**.

Mission statement(s) defines a department's objectives and outlines the approach it will take to achieve its Vision. It explains how the department will fulfill its purpose and goals, helping to create a clear plan of action.

The Mission reflects the department's past and present, articulating why it exists and the role it plays in society. Additionally, it serves as a measure of progress, indicating whether the department is on track or needs to adjust its strategy.

In essence, the Vision is a future-oriented, big-picture goal, while the Mission is a more immediate, present-focused statement about how to achieve that Vision.

For your reference, we have provided examples of Vision and Mission statements from various organizations in Table 2.

Table 2: Examples of Vision and Mission Statements

LinkedIn:

Vision: To create economic opportunity for every member of the global workforce

Mission: To connect the world's professionals to make them more productive and successful

Nike:

Vision: To do everything possible to expand human potential

Mission: To bring inspiration and innovation to every athlete in the world

Uber:

Vision: To ignite opportunity by setting the world in motion

Mission: To provide transportation as reliable as running water, everywhere, for everyone

Department of Medicine (University of Wisconsin)

Vision: Health and equity for all

Mission: Develop exceptional leaders who transform the world of medicine through scholarship, innovation and partnership.

Centre for Entrepreneurship (Ashoka University)

Vision: Inspire, Inculcate and incubate game-changing ideas for India and the world

Mission:

- Creating a strong foundation of academic learning in the field of entrepreneurship not only to acquaint students with concepts but also with the application of the same.

JGi JAIN DEEMED-TO-BE UNIVERSITY

- Inculcating a culture of innovation and an entrepreneurial spirit on the campus, through various activities and campaigns.
- Serving as a catalyst for entrepreneurship at Ashoka University by supporting and incubating entrepreneurial ideas.

JAIN (Deemed-to-be University) is a multi-disciplinary institution that brings its vision to life through the work of 6 Faculties, 28 Departments, and multiple Centers. Given the crucial role that departments play in the University's overall success, it is essential that each department's vision aligns with the broader aspirations outlined in the University's Vision and Mission, while also reflecting the unique requirements of their specific domains.

JAIN's Vision and Mission

Vision: To foster human development through excellence in Quality Education, Research, and Entrepreneurial Development

Mission:

- To provide quality education, creating human assets / manpower and intellectual capital.
- To enhance research and development in different disciplines
- To develop new generation entrepreneurs who will be instrumental in fuelling economic growth
- To create able Leaders, Managers, and Technocrats
- To foster an ethical environment founded on human values in which both spirit and skill will thrive to enrich the quality of life.

B) Framework to analyze the Educational and Social Landscape (Suggested)

The process of formulating or reviewing your department's Vision and Mission begins with the Department Program Assessment Committee (DPAC) analyzing the external landscape to identify potential aspirations for the department. A **PESTEL** Analysis, which examines Political, Economic, Social, Technological, Environmental, and Legal factors, is a well-established tool for

assessing the external environment and understanding the influences on your Institution, Department, or Academic Program.

Understanding PESTEL Factors in Higher Education Institutions (HEIs): **PESTEL** Analysis helps to systematically evaluate the various external factors that could impact your department's strategic direction. By understanding these factors, you can identify both opportunities to leverage and threats or challenges to address.

For instance, in Table 3, we have provided a description of the PESTEL factors and applied it to the Microbiology domain as an illustrative example.

How PESTEL Analysis Informs Strategic Planning**:** Conducting a PESTEL analysis for your department will allow you to:

Identify Opportunities: Recognize external conditions that can be leveraged to strengthen your department. (In table 3, we have highlighted the factors with a positive impact in green text) ***Spot Threats/Challenges***: Understand the external challenges that need to be addressed to avoid potential setbacks. (In the illustration, the factors with a negative impact are marked in red.)

These insights are critical for crafting a Vision and Mission that are forward-looking and responsive to external realities. Moreover, the PESTEL analysis provides valuable inputs for defining Program Education Objectives (PEOs) and Program Outcomes (POs), ensuring that your department's strategic goals are aligned with external opportunities and threats.

By incorporating PESTEL analysis into your strategic planning, you can create a robust and adaptable framework that guides your department towards sustainable growth and success.

The Vision-Mission formulation / review process begins with the DPAC analyzing the external landscape to envision possible aspirations for the department.

It is recommended that the PESTEL analysis is carried out by key internal members of the DPAC (including Dean / HoD, Area Chairs, Senior Professors) a week prior to the first DPAC meeting.

Table 3: PESTEL Analysis with Example

Factor	Meaning	Example (Microbiology)

Political	Government policies, regulations and international relations	**Government Support** ● The Indian government's focus on promoting STEM education benefits microbiology programs. ● Initiatives like the National Mission on Education through ICT and funding for research in life sciences enhance the educational landscape. **Regulatory Framework** ● UGC is the primary regulatory body for Microbiology. Policies around curriculum, NEP, NCrF, Research grants directly impact education in Microbiology **Public Health Priorities** ● The government's emphasis on public health, particularly after the COVID-19 pandemic, has increased the focus on microbiology as a critical field for research and education.
Economical	Business investments in the domain, employment opportunities	**Business Investments** India emerging as a major market for Microbiology Testing. This market is valued at about USD 130 Million and is expected to continue growing at about 6% **Employment Opportunities** The demand for microbiologists in various sectors like healthcare, pharmaceuticals, agriculture, and environmental management affects the attractiveness of microbiology programs.
Social	Demographic shifts in population, Societal attitudes and perceptions towards the domain, diversity and inclusion in the domain	**Demographic Changes** ● A young and growing population in the country ● Entry of more women into STEM courses **Public Awareness** ● Increasing public awareness about the importance of microbiology in healthcare, food safety, and environmental sustainability drives interest in the field. The COVID-19 pandemic has particularly highlighted the critical role of microbiologists. **Career Preferences**

JGI JAIN DEEMED-TO-BE UNIVERSITY

		● Medical sciences and MBBS continues to be a preferred choice for parents and students
Technological	Technological development in the domain, possibilities of technology disruptions – rapidity of technology change. Also, technology in terms of educational and learning tools	**Advances in Research Technology** ● Rapid advancements in genomics, proteomics, and bioinformatics are transforming microbiology. Universities must integrate these technologies into their curriculum to keep programs relevant. **Digital Learning Tools** ● The adoption of online learning platforms, virtual labs, and digital resources enhances the learning experience for microbiology students. **Research Collaboration** ● Inadequate Industry-academia connect is leading to disparity between the recency and relevance of the technologies taught to those practiced.
Environmental	The impact of the environmental changes to the domain	**Sustainability and Environmental Awareness** ● Microbiology plays a crucial role in addressing environmental issues such as pollution, waste management, and climate change. This relevance drives interest in the field and influences curriculum development. **Climate Change Impact** ● Environmental changes can affect the prevalence of certain microorganisms, leading to new research opportunities and shifts in educational focus within microbiology programs. **Green Campus Initiatives** ● Universities are increasingly adopting green practices, which may include research in environmental microbiology and sustainable lab practices, contributing to a holistic educational approach.
Legal	The legal frameworks for the domain. The accreditations and affiliation requirements for the institution	**Regulatory Compliance** ● Compliance with national and international standards in microbiology education, including laboratory safety regulations, is essential for maintaining program accreditation and ensuring student safety. **Ethical Considerations**

JGI JAIN DEEMED-TO-BE UNIVERSITY

- Legal frameworks around the ethical use of microorganisms in research, genetic modification, and biotechnology affect the curriculum and research opportunities within microbiology programs.

C) Process for Formulating / Analyzing / Refining Vision and Mission Statements

Currently, Vision and Mission statements exist across various units within the University. An analysis of these statements has highlighted two areas of improvement / correction.

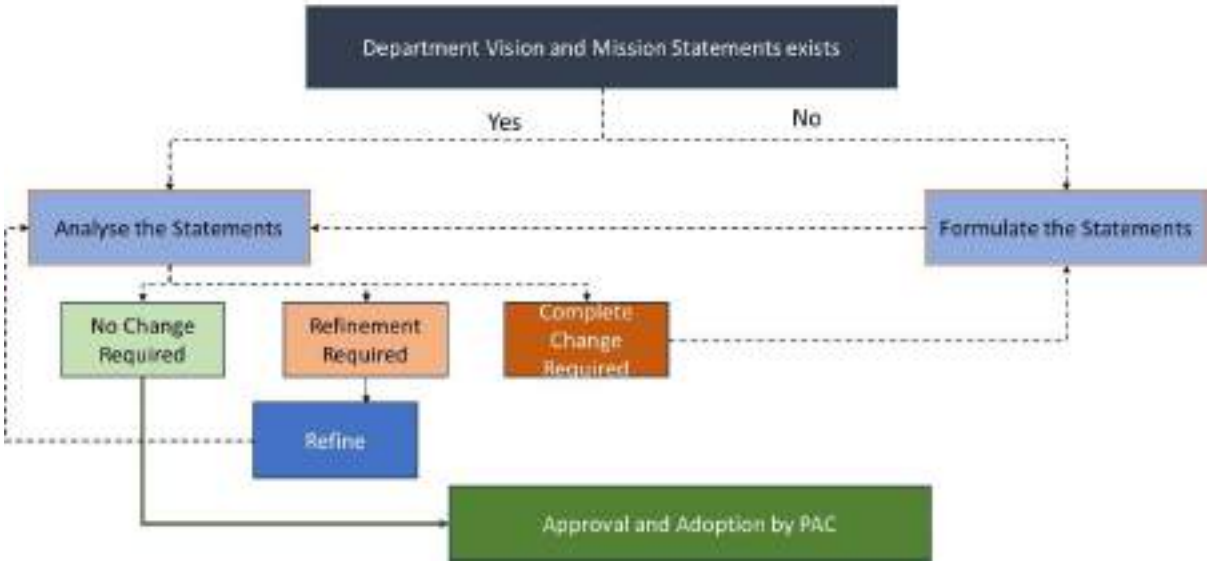
1) ***Misalignment of Unit Scope***: Vision and Mission statements have sometimes been developed for the wrong unit—such as a School or an individual program—rather than for the Department as a whole. *(Refer Annexure 2 - notification from the Vice Chancellor's office in February 2024 delineating Faculties, Departments and Programs).*

2) ***Inadequate Representation***: In some cases, these statements fail to appropriately capture the aspirations of the department. They may be too broad, too narrow, or lack alignment with the overarching Vision of the University.

The Office of Academics through this document, recommends a structured process to guide departments in the formulation, analysis, and refinement of their Vision and Mission statements.

The goal is to ensure that each department's Vision and Mission accurately reflect its unique goals and aspirations while remaining in harmony with the University's broader strategic objectives. By following these guidelines, departments can create Vision and Mission statements that are clear, focused, and aligned with both their specific needs and the University's overall Vision.

Figure 1: Vision and Mission (Formulation v/s Refinement)



a. Formulation of Vision and Mission Statements

The process for formulating the Vision and Mission statements in the DPAC meeting begins with the Dean or Head of Department (HOD) sharing their views and aspirations for the department. This sets the stage for the discussion by providing a leadership perspective on the department's future direction.

Following this, the results of the PESTEL analysis and placement highlights are presented to the DPAC members, offering a comprehensive overview of the external environment and employment trends relevant to the department. External invitees, who bring valuable industry and academic insights, are then invited to share their perspectives.

With these diverse inputs, the DPAC proceeds to generate a list of keywords that encapsulate the department's future aspirations. To facilitate focused discussion, the DPAC divides into smaller groups, where each group creates draft Vision and Mission statements based on the identified keywords.

The statements generated by the smaller groups are then pooled together, and the DPAC reconvenes to discuss and synthesize these drafts into consolidated Vision and Mission statements. The final statements are then subjected to a detailed analysis using the criteria outlined in the forthcoming section of this document, ensuring they effectively capture the department's goals and align with the University's broader Vision.

b. Analysis of Vision and Mission Statements

The Vision statement of the Department needs to be analyzed by each member and invitee of the DPAC. The brief questionnaire below (table 4) may be used as a guide for analyzing the appropriateness of the Vision statement and table 5 for Mission Statements

Figure 2: Process for Formulation of Vision and Mission Statement

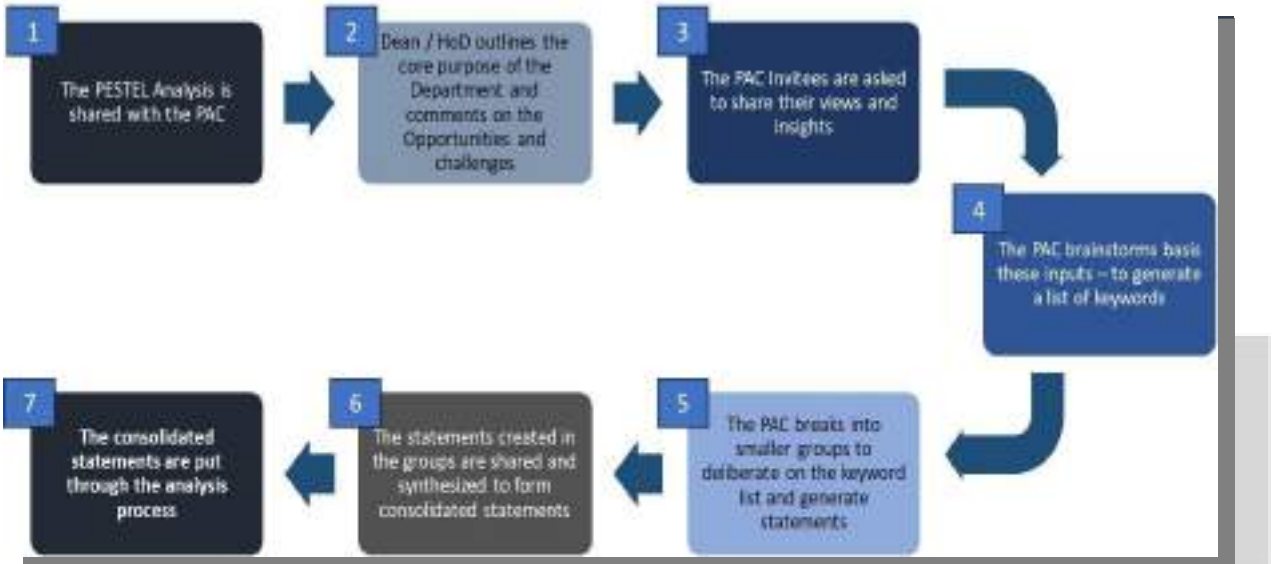


Table 4: Guidelines for analyzing Vision Statement

DEEMED-TO-BE UNIVERSITY

Criteria	1 Strongly Disagree	2 Disagree	3 Neutral	4 Agree	5 Strongly Agree
The Department's Vision statement is futuristic					
The Department's Vision Statement captures the essence of what the department wants to be known for					
The Department's Vision Statement is aligned to the University's Vision					
It will be possible to achieve the Department's Vision					
It will be possible to measure the achievement of the Department's Vision					

Table 5: Guidelines for analyzing Mission Statement(s)					
	Strongly Disagree	**Disagree**	**Neutral**	**Agree**	**Strongly Agree**
The Departments' Mission Statements are derived from the Department's Vision Statement *(Achieving the mission statements would lead to the achievement of the vision statement)*					
The achievement of the Department's Mission Statements can be measured					
Please specify why you think the Department's Mission Statements are aligned to the Department's Vision:					

Given the importance of Vision and Mission statements in defining the Department's aspirations and goals, it is crucial to reach near consensus among DPAC members and invitees on their appropriateness based on the established criteria (refer table 4 and 5). The decision to accept, refine, or rework the statements should be guided by the average scores for each criterion, as evaluated by the DPAC. The recommendations are as follows:

- **Average score >4 and ≤5 for all criteria:** Accept the Statement.
- **Average score between 3 and ≤4 for any criterion:** Refine the Statement.
- **Average score ≤3 for any criterion:** Rework and Reformulate the Statement.

JGI JAIN DEEMED-TO-BE UNIVERSITY

D) Refining Vision and Mission Statements

Step 1: The DPAC is expected to discuss the underlying reasons for any criterion that receives an average score below 4 and brainstorm ways to improve the score by:

i. Rephrasing the statement(s), and /or

ii. Including or excluding specific elements from the statement(s), and / or

iii. Refining the language

Step 2: The refined statement may be accepted by the DPAC through a show of hands.

IV. Program Educational Objectives (PEOs)

In the context of formulating and / or refining Program Educational Objectives, in this segment we will cover:

A) Meaning and importance of Graduate Attributes and PEOs
B) The process of formulating and / or refining PEOs
C) PEOs – Alignment to Mission Statement(s)
D) Analyzing PEOs

A) Meaning and Importance of Graduate Attributes and PEOs

UGC describes ***Graduate Attributes (GAs)*** as attributes of a graduate "*that reflect the particular quality and feature or characteristics of an individual, including the knowledge, skills, attitudes and values that are expected to be acquired by a graduate through studies at the higher education institution (HEI)"*. Graduate attributes are expected to be fostered through meaningful learning experiences made available through the curriculum and the total experiences gathered during their tenure at the college / university.

The graduate attributes reflect both disciplinary knowledge and understanding, generic skills, including global competencies, that all students in different academic fields of study should acquire/ attain and demonstrate. Some of the characteristic attributes that UGC broadly indicates are:

- Disciplinary Knowledge
- Research-related skills
- Self-directed learning
- Communication Skills
- Cooperation/Team work
- Multicultural competence
- Critical Thinking
- Scientific reasoning
- Moral and ethical awareness/reasoning
- Problem Solving
- Reflective thinking
- Leadership readiness/ qualities
- Analytical Reasoning
- Information/Digital literacy
- Lifelong learning

Program Educational Objectives (PEOs)

While GAs are usually generic and applicable to all students with higher education degrees, **Program Educational Objectives (PEOs)** are more specific to the Program that a student has pursued as a part of his / her higher education journey. **Program Educational Objectives are the broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.**

Graduates of the program go into a variety of career/work environments, graduate school, industry, business, entrepreneurial activities, military, etc. The context within which graduates will manifest the

learning outcomes (what they learned by the time of graduation) will vary widely. That is, there is no one common environment for graduates of the program to demonstrate the objectives. As a result, the **PEOs, by their nature, are broadly stated and** should **not** be narrowly defined. Also, since the PEOs are reflective of the career goals of the graduates of the program, for the process of establishing the objectives, the program generally looks to employers, alumni, faculty, and perhaps graduate schools when determining what graduates of the program will need **(life-skills AND technical skills)** in order to be successful in their careers. *(Sample PEOs have been given here for your reference / guidance in table 6).*

Table 6: Sample Program Educational Objectives
Sample of PEOs for an Under Graduate Program in Microbiology:
PEO1: ***Foundation in Microbiology and Allied Sciences.*** Graduates will have a strong foundational knowledge in microbiology and related sciences, enabling them to pursue advanced studies or careers in research, healthcare, biotechnology, environmental science, or related fields.
PEO2: ***Application of Microbiological Concepts.*** Graduates will apply microbiological concepts and techniques to solve real-world problems in diverse settings, including laboratories, industry, public health, and environmental management.
PEO3: ***Professional and Ethical Responsibility.*** Graduates will demonstrate professional integrity, ethical responsibility, and a commitment to lifelong learning in their professional careers, contributing positively to society.
PEO4: ***Communication and Collaboration.*** Graduates will effectively communicate scientific information and collaborate in multidisciplinary teams, contributing to innovations and advancements in microbiology and related fields.
PEO5: ***Adaptability and Problem-Solving.*** Graduates will be equipped with critical thinking and problem-solving skills, allowing them to adapt to evolving scientific and technological landscapes in microbiology and allied professions.

JAIN DEEMED-TO-BE UNIVERSITY

Sample of PEOs for an Under Graduate Program in Dance

PEO1: ***Artistic Excellence and Creativity.*** Graduates will demonstrate artistic excellence, creativity, and technical proficiency in various dance forms, enabling them to pursue careers as performers, choreographers, and dance educators.

PEO2: ***Professional and Ethical Engagement.*** Graduates will exhibit professional integrity, ethical responsibility, and a commitment to the cultural and social significance of dance, contributing positively to the arts community and society at large.

PEO3: ***Communication and Collaboration in the Arts.*** Graduates will effectively communicate artistic ideas and collaborate with other artists and professionals in multidisciplinary settings, fostering innovation and creativity in the performing arts.

PEO4: ***Lifelong Learning and Adaptability.*** Graduates will be equipped with the skills and mindset necessary for lifelong learning, allowing them to adapt to the evolving landscape of the dance profession and related fields.

PEO5: ***Cultural and Global Awareness.*** Graduates will have a deep understanding of diverse cultural dance traditions and global perspectives, enabling them to contribute to the preservation and evolution of dance as a dynamic art form.

B) Process for Formulating / Refining PEOs

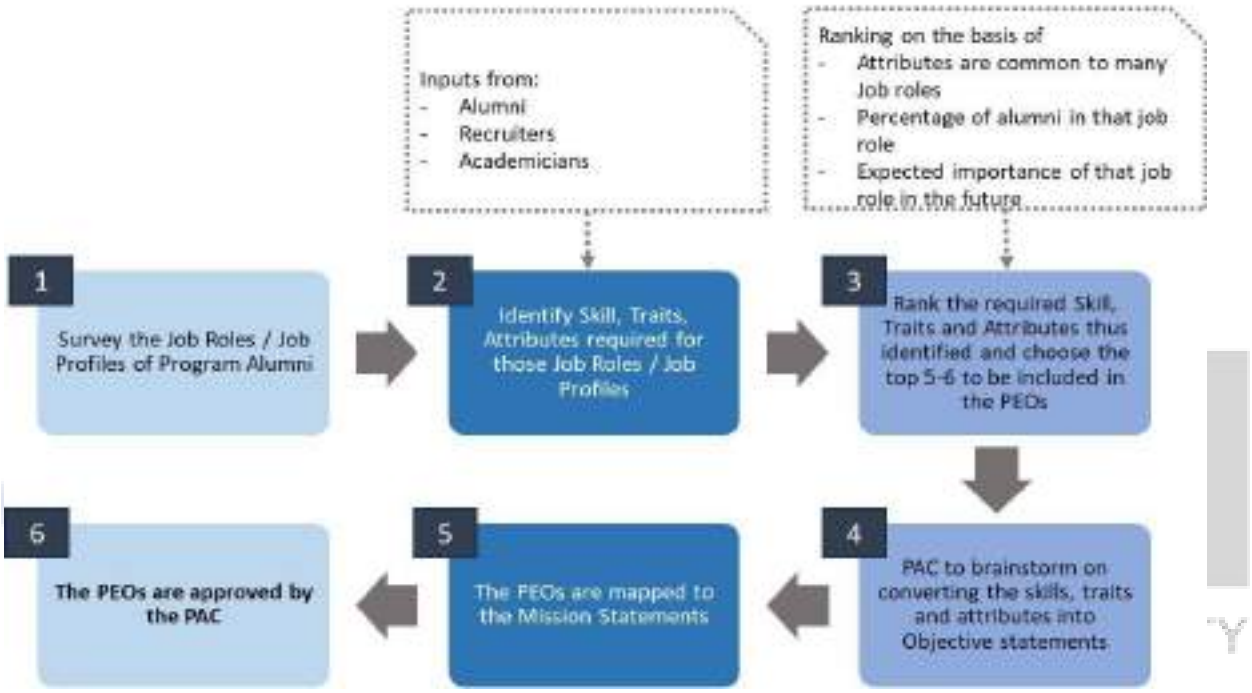
Since the PEOs reflect the attributes that alumni exhibit 3-5 years after graduation, the formulation process should begin by surveying the Job Roles, Job Profiles, and Career Progressions of alumni. This is followed by identifying the skills, traits, and attributes required in those roles, with insights from alumni, recruiters, and academicians. **These initial steps should be completed before the DPAC meeting.**

During the DPAC meeting, the committee ranks these skills and attributes in order of importance. The ranking may be based on:

1. Identifying attributes common to multiple job roles.
2. Emphasizing attributes critical for roles where a significant percentage of alumni are employed.
3. Considering the future relevance of job roles, informed by the earlier PESTEL analysis.

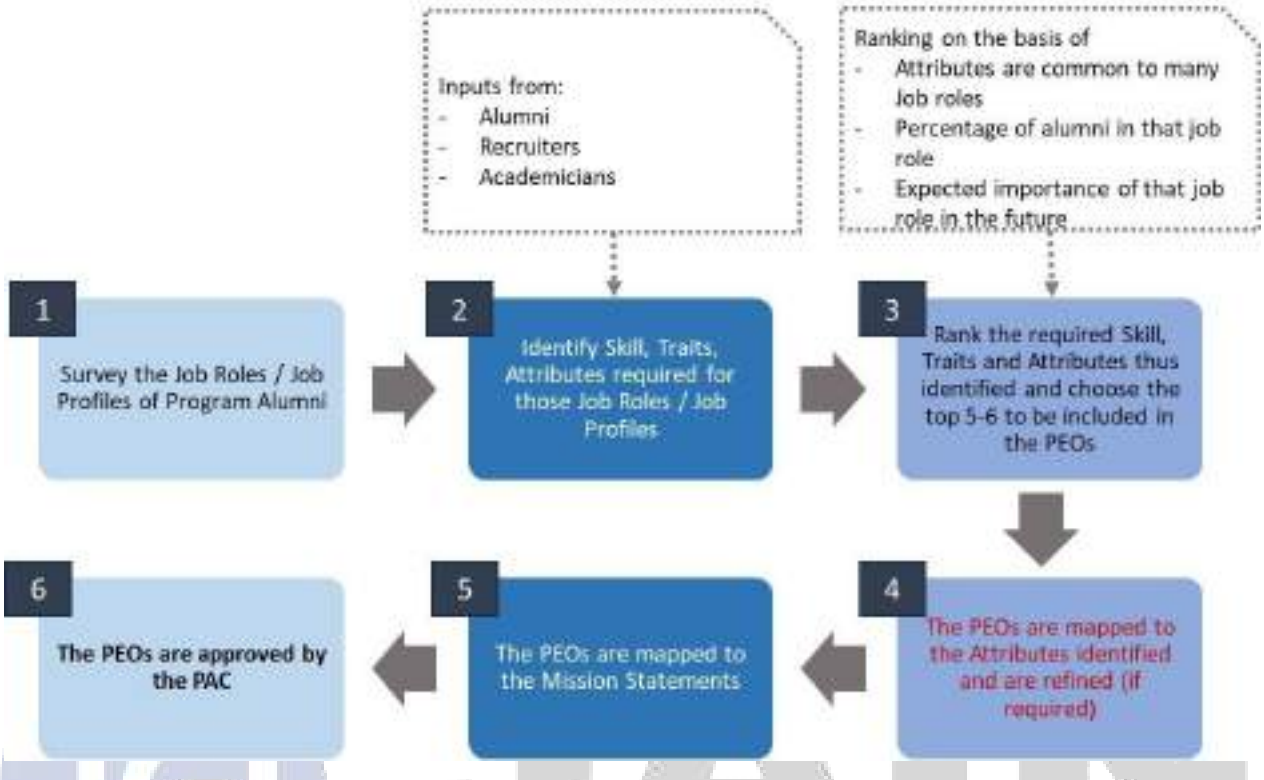
The top 5-6 skills and attributes are then selected for inclusion in the PEOs. The DPAC is expected to brainstorm on how to translate these skills and attributes into clear, actionable Program Educational Objectives. The resulting PEO statements are then analysed for their alignment with the department's Mission statement(s) and subsequently approved by the DPAC. *(Refer to Figure 3 for the process flow.)*

Figure 3: Process for Formulation Program Educational Objectives (PEOS)



For existing PEOs, steps 1 to 3 remain the same. At step 4, instead of creating new statements from the highest-ranked attributes, it is recommended to map the existing PEOs to these attributes. If necessary, the PEOs should be refined to better align with the identified attributes (refer figure 4).

Figure 4: Process for Refining Program Educational Objectives (PEOS)



C) PEOs – Alignment to Mission Statement(s)

The Department's Vision and Mission statements are expected to act as the beacon for all aspects of the program delivery and design. Since the PEOs are the highest-level planning at the Program level, mapping the PEOs to the Mission Statements would serve as a compass to ensure that the Program level planning is in the right direction. *(The format for mapping PEOs to Mission Statement(s) is in table 6).*

Table 7: PEO and Mission Statement(s) mapping

Map the PEOs to the Mission Statements as ***High (H), Medium (M) or Low (L).*** *If there is no mapping leave it as a blank.*

PEOs/Mission	Mission 1	Mission 2	Mission 3	Mission 4	Mission 5
PEO1					
PEO2					
PEO3					

PEO4					
PEO5					
PEO6					
PEO7					

**Write short justifications for why you think a PEO maps to a particular Mission Statement*

D) Analyzing PEOs

Since PEOs are the attributes that the Graduates should exhibit in their professional life in varied career paths, it should be:

- Formulated with inputs from alumni, employers (industry experts) and senior academicians.
- Should reflect broadly required life skills (60%) in the context of the technical skills of the program (40%)

Also, the PEOs need to be deeply connected with the Department's Mission Statement. These aspects need to be considered while analyzing the appropriateness of PEOs. *(Format for analyzing PEOs is given in table 8)*

Table 8: Analyzing PEOs

The PEOs have been framed with inputs from Employers	Yes	No
The PEOs have been framed with inputs from alumni	Yes	No
The PEOs have been framed with inputs from peer HEIs and Academicians in the domain	Yes	No
All Mission statements have one or more PEOs that map highly to it	Yes	No
All PEOs map highly to one or more Mission Statements	Yes	No

V. Program Outcomes and Program Specific Outcomes (PO / PSOs)

A) Program Outcomes (POs) and Program Specific Outcomes (PSOs) – meaning and importance

Program Outcomes (POs) are specific statements that describe what students should be able to accomplish upon completing a degree program. They outline the knowledge, skills, and attitudes that students are expected to have attained by the end of the program. POs play a crucial role in guiding curriculum development, measuring student learning, and assessing program effectiveness. They provide a structured framework for designing courses, assessments, and other educational experiences.

Additionally, POs serve as a key communication tool between the program and its stakeholders—faculty, students, employers, and accrediting bodies.

Program Specific Outcomes (PSOs) *become relevant under the following conditions:*

- ***For Departments Offering Multiple Related Programs***: In departments that offer several related programs, such as a Department of Basic and Applied Sciences with programs in Physics, Chemistry, Microbiology, Botany, etc., common outcomes may be shared across programs, such as "Exhibit scientific temper" or "Research Orientation," which are captured in the POs. In such cases, individual programs should develop PSOs to highlight the unique aspects of their specific program compared to others within the department. For example, the unique outcomes for the Physics program would be captured in its PSOs.
- ***When Program Outcomes Are Specified by External Bodies:*** In fields where program outcomes are mandated by an external accrediting body, such as Engineering, individual programs can use PSOs to capture their unique offerings and distinct characteristics that go beyond the standard POs.

B) Guidelines and Analysis of POs / PSOs

The DPAC is advised to keep in mind the following guidelines while formulating / analyzing / refining POs and PSOs.

JAIN DEEMED-TO-BE UNIVERSITY

- At JAIN, all programs are expected to have between 7-12 Program Outcomes. (3-4 PSOs wherever PSOs are applicable)
- Program Outcome statement should be a logical conclusion to a statement that starts with “At the end of the program the student should be able to…” OR “On completion of the program, the student should be able to…”
- Since POs are what the student should be able to “Do” at the end of the program, it is recommended to consider the Bloom’s Taxonomy while formulating / analyzing POs.
- 60% of the POs should be related to technical skills and the remaining 40% to life-skills.
- The life skills should necessarily include the following components: a) PO(s) that refers to ethics, human values and SDGs; b) PO(s) about developing a multi-disciplinary approach to life-long learning, c) Entrepreneurial mindset and d) communication and language skills.

The format for analyzing POs / PSOs is provided in table 9.

Table 9: Analyzing POs		
The number of POs is between 7-12*	Yes	No
**If no, then please add or consolidate as required*		
50% - 60% of the POs relate to Technical Skills	Yes	No
30% - 40% of the POs relate to Life-Skills	Yes	No
There is/are PO(s) that refer to ethics, human values and sustainability	Yes	No
There is/are PO(s) that refer to multi-disciplinary	Yes	No
There is/are PO(s) that refer to entrepreneurship	Yes	No
There is/are PO(s) that refer to communication and language skills	Yes	No
The POs are a logical conclusion to a sentence that start with "At the end of the program the student should be able to" OR "On completion of the program, the student should be able to…." **	Yes	No

***If no, then rephrase the statement*

JGI JAIN DEEMED-TO-BE UNIVERSITY

C) Relationship between POs and PEOs

The OBE process functions as an interconnected chain, where the attainment of POs leads to the achievement of PEOs, which in turn helps the department fulfill its Mission and ultimately realize its Vision. To ensure this alignment, it is essential to map the POs to the PEOs (refer to the format provided in Table 11).

Understanding the differences between PEOs and POs is crucial before mapping them. The key distinctions between PEOs and POs are outlined in Table 10. It is recommended that the DPAC thoroughly reviews the Program's Objectives and Outcomes to ensure these critical differences are accurately reflected.

Table 10: Distinguishing between PEOs and POs		
Point of Difference	**PEO**	**PO**
Nature of the Statements	Broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.	Statements that describe what students are expected to know or be able to do by the end of the academic program.
Degree of Specificity	Since PEOs is about career and professional accomplishments, and graduates may pursue varied and diverse career paths, it is important to have PEOs as broad statements	POs are the result of shared experiences of students during the course. Except for a limited number of elective courses, all students experience the same curriculum. Therefore, POs may be more specific and measurable and the achievement of the performance indicators should be confirmable through evidence.
Primary Stakeholders	Employers and Alumni	Institution's management, Faculty and students
Purpose of assessment	To determine if the program continues to be relevant to the profession and society.	To determine if students, at the end of the program have achieved the outcomes

While POs and PEOs are conceptually different, we need to understand the relationship between them. A graduate who has accomplished the Program Outcomes at the end of the academic program is expected to exhibit the PEOs as an alumnus in the 3-4 years after graduation. Thus, POs would need to be aligned to the PEOs (refer table 11 for the format).

Table 11: PO to PEO Mapping

Tick the boxes where the POs are related to PEO

On the basis of the mapping, check if:		
All PEOs have one or more POs that map to it	Yes	No
All POs map to one or more PEOs	Yes	No

VI. Conclusion for PART A

This guide serves as a crucial resource for departments within JAIN (Deemed-to-be University) in their journey towards effective implementation of Outcome-Based Education (OBE). By establishing the Department Program Assessment Committees (DPACs) and following the structured processes outlined in this document, departments can ensure that their strategic direction aligns with the University's overarching vision while addressing the unique needs of their disciplines.

The frameworks and toolkits provided for developing Vision and Mission statements, Program Educational Objectives (PEOs), and Program Outcomes (POs) / Program Specific Outcomes (PSOs) offer a systematic approach to creating a cohesive educational strategy. These elements, when properly aligned, form the backbone of a robust OBE system that enhances student learning experiences and outcomes.

It is important to remember that this document is not just a set of guidelines, but a call to action for continuous improvement and reflection. Regular review and refinement of these strategic elements will ensure that our academic programs remain relevant, responsive to industry needs, and aligned with societal expectations. As we move forward, the successful implementation of these processes will play a vital role in conducting effective Board of Studies by refining our curriculum design and development process.

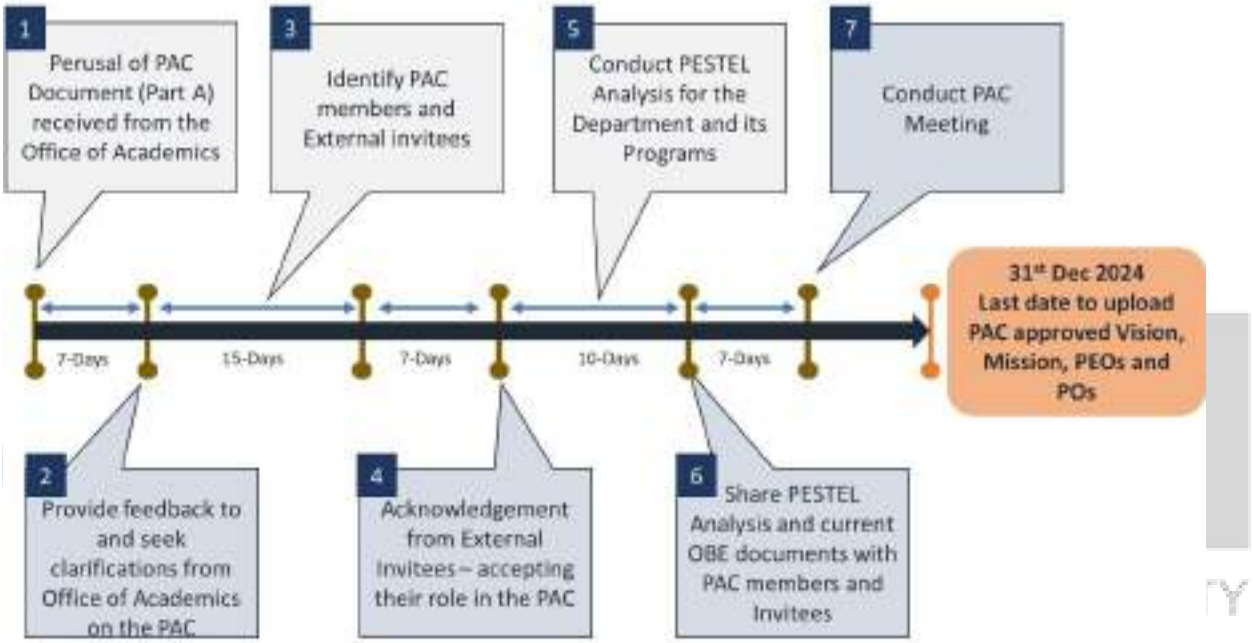
The journey of OBE is ongoing, and this document marks an important step in that journey. It is now up to each department to utilize these tools effectively, engage in meaningful discussions within their DPACs, and work collaboratively towards achieving excellence in education and student outcomes.

JGi JAIN DEEMED-TO-BE UNIVERSITY

Annexure 1: Recommended Timelines

The last date to upload the DPAC approved Vision, Mission, PEOs and POs for AY2025-26 is **31st December 2024**. The entire process is expected to take about 1.5-2 months. The recommended timelines in figure 5 is indicative of the maximum number of days required for each milestone.

Figure 5: Recommended Timelines



It is recommended that the DPAC meeting be conducted in an offline full-day workshop mode to allow for adequate deliberations and discussions.

DEPARTMENT PROGRAM ASSESSMENT COMMITTEE (DPAC)

TEMPLATES

JGi JAIN DEEMED-TO-BE UNIVERSITY

DEPARTMENT PROGRAM ASSESSMENT COMMITTEE (DPAC) - TEMPLATES

I. Composition of the Department Program Assessment Committee

A total of **fourteen categories** have been identified as necessary components of the DPAC (refer Table 1), and the Chairperson / Co-chairperson is to ensure that each meeting of the DPAC is represented by at least one member / invitee from each category.

The departments with larger number of Programs and / or Areas may expand the DPAC to include up to 40 (members + invitees), while departments offering 1-3 Programs may restrict the number to 20 (members + invitees). The Dean of the faculty shall be the chairperson of the DPAC and the HoD the Co-Chairperson.

Table 1: Composition of the Department Program Assessment Committee (DPAC)

	Category	Role in DPAC	Name	Designation
1	**Dean of Faculty / Director of School***	Chairperson	**1.**	
2	**Head of Department**	Co-Chairperson	**1.**	
3	**Area Chair / Area Head**	Member	**1.** **2.** **3.** 4. 5. 6. 7. 8.	

JAIN DEEMED-TO-BE UNIVERSITY

4	**Program Head / Program Coordinator**	Member	**1.** **2.** **3.** 4. 5. 6. 7. 8.	
5	**Senior Non-Teaching Staff**	Member	**1.**	
6	**Representative of the Office of Academics (OOA) of the University**	Internal Invitee	**1.**	
7	**Current Student**	Internal Invitee	**1.** 2. 3. 4. 5.

15	**Academician**	External Invitee	**1.** **2.**	

II. Vision and Mission Statements for the Department

- **Framework to analyze the Educational and Social Landscape (Suggested)**

Identify Opportunities: Recognize external conditions that can be leveraged to strengthen your department. (In table 3, we have highlighted the factors with a positive impact in green text) ***Spot Threats/Challenges***: Understand the external challenges that need to be addressed to avoid potential setbacks. (In the illustration, the factors with a negative impact are marked in red.)

It is recommended that the PESTEL analysis is carried out by key internal members of the DPAC (including Dean / HoD, Area Chairs, Senior Professors) a week prior to the first DPAC meeting.

Table 2: PESTEL Analysis

Factor	Meaning	Opportunities/Challenges
Political	Government policies, regulations and international relations	**Government Support** ● **Regulatory Framework** ● **Public Health Priorities** ●
Economical	Business investments in the domain, employment opportunities	**Business Investments** ● **Employment Opportunities** ●
Social	Demographic shifts in population, Societal attitudes and perceptions towards the domain, diversity and inclusion in the domain	**Demographic Changes** ● **Public Awareness** ● **Career Preferences** ●
Technological	Technological development in the domain, possibilities of technology disruptions – rapidity of technology change. Also, technology in	**Advances in Research Technology** ● **Digital Learning Tools** ●

	terms of educational and learning tools	**Research Collaboration** ●
Environmental	The impact of the environmental changes to the domain	**Sustainability and Environmental Awareness** ● **Climate Change Impact** ● **Green Campus Initiatives** ●
Legal	The legal frameworks for the domain. The accreditations and affiliation requirements for the institution	**Regulatory Compliance** ● **Ethical Considerations** ●

JGI JAIN DEEMED-TO-BE UNIVERSITY

- **Process for Formulating / Analyzing / Refining Vision and Mission Statements**

c. Analysis of Vision and Mission Statements

Table 3: Guidelines for analyzing Vision Statement

	1	2	3	4	5
Criteria	**Strongly Disagree**	**Disagree**	**Neutral**	**Agree**	**Strongly Agree**
The Department's Vision statement is futuristic					
The Department's Vision Statement captures the essence of what the department wants to be known for					
The Department's Vision Statement is aligned to the University's Vision					

It will be possible to achieve the Department's Vision					
It will be possible to measure the achievement of the Department's Vision					

Table 4: Guidelines for analyzing Mission Statements

	Strongly Disagree	**Disagree**	**Neutral**	**Agree**	**Strongly Agree**
The Departments' Mission Statements are derived from the Department's Vision Statement *(Achieving the mission statements would lead to the achievement of the vision statement)*					
The achievement of the Department's Mission Statements can be measured					

Please specify why you think the Department's Mission Statements are aligned to the Department's Vision:

_____

The decision to accept, refine, or rework the statements should be guided by the average scores for each criterion, as evaluated by the DPAC. The recommendations are as follows:

- **Average score >4 and ≤5 for all criteria:** Accept the Statement.
- **Average score between 3 and ≤4 for any criterion:** Refine the Statement.
- **Average score ≤3 for any criterion:** Rework and Reformulate the Statement.

JAIN DEEMED-TO-BE UNIVERSITY

- **Refining Vision and Mission Statements**

Step 1: The DPAC is expected to discuss the underlying reasons for any criterion that receives an average score below 4 and brainstorm ways to improve the score by:

i. Rephrasing the statement(s), and /or
ii. Including or excluding specific elements from the statement(s), and / or
iii. Refining the language

Step 2: The refined statement may be accepted by the DPAC through a show of hands.

Final Vision and Mission Statements

	M2
	M3
	M4
	M5

JGi JAIN DEEMED-TO-BE UNIVERSITY

III. Program Educational Objectives (PEOs)

During the DPAC meeting, the committee ranks these skills and attributes in order of importance. The ranking may be based on:

1. Identifying attributes common to multiple job roles.
2. Emphasizing attributes critical for roles where a significant percentage of alumni are employed.
3. Considering the future relevance of job roles, informed by the earlier PESTEL analysis.

The top 5-6 skills and attributes are then selected for inclusion in the PEOs. The DPAC is expected to brainstorm on how to translate these skills and attributes into clear, actionable Program Educational Objectives. The resulting PEO statements are then analysed for their alignment with the department's Mission statement(s) and subsequently approved by the DPAC.

Final Program Educational Objectives (PEOs)

- **Analyzing PEOs**

Since PEOs are the attributes that the Graduates should exhibit in their professional life in varied career paths, it should be:

o Formulated with inputs from alumni, employers (industry experts) and senior academicians.
o Should reflect broadly required life skills (60%) in the context of the technical skills of the program (40%)

Also, the PEOs need to be deeply connected with the Department's Mission Statement.

These aspects need to be considered while analyzing the appropriateness of PEOs.

Table 7: Analyzing PEOs

Aspects to be considered	Yes / No
The PEOs have been framed with inputs from Employers	
The PEOs have been framed with inputs from alumni	
The PEOs have been framed with inputs from peer HEIs and Academicians in the domain	
All Mission statements have one or more PEOs that map highly to it	
All PEOs map highly to one or more Mission Statements	

IV. Program Outcomes and Program Specific Outcomes (PO / PSOs)

- ***Program Outcomes (POs)***

Table 8: Analyzing POs

Aspects to be considered	Yes / No
The number of POs is between 7-12*	
50% - 60% of the POs relate to Technical Skills	
30% - 40% of the POs relate to Life-Skills	
There is/are PO(s) that refer to ethics, human values and sustainability	
There is/are PO(s) that refer to multi-disciplinarity	
There is/are PO(s) that refer to entrepreneurship	
There is/are PO(s) that refer to communication and language skills	
The POs are a logical conclusion to a sentence that start with "At the end of the program the student should be able to" OR "On completion of the program, the student should be able to…." **	

**If no, then please add or consolidate as required*
***If no, then rephrase the statement*

Final POs

PO1	
PO2	
PO3	
PO4	
PO5	
PO6	
PO7	
PO12	

- ***Program Specific Outcomes (PSOs)***

Program Specific Outcomes (PSOs) become relevant under the following conditions:

- ***For Departments Offering Multiple Related Programs***: In departments that offer several related programs, such as a Department of Basic and Applied Sciences with programs in Physics, Chemistry, Microbiology, Botany, etc., common outcomes may be shared across programs, such as "Exhibit scientific temper" or "Research Orientation," which are captured in the POs. In such cases, individual programs should develop PSOs to highlight the unique aspects of their specific program compared to others within the department. For example, the unique outcomes for the Physics program would be captured in its PSOs.
- ***When Program Outcomes Are Specified by External Bodies:*** In fields where program outcomes are mandated by an external accrediting body, such as Engineering, individual programs can use PSOs to capture their unique offerings and distinct characteristics that go beyond the standard POs.

Final PSOs	
PSO1	
PSO2	
PSO3	

- ***Relationship between POs and PEOs***

The OBE process functions as an interconnected chain, where the attainment of POs leads to the achievement of PEOs, which in turn helps the department fulfill its Mission and ultimately realize its Vision. To ensure this alignment, it is essential to map the POs to the PEOs.

Table 9: PO to PEO Mapping

Tick the boxes where the POs are related to PEO

On the basis of the mapping, check if:

All PEOs have one or more POs that map to it	Yes	No
All POs map to one or more PEOs	Yes	No

The last date to upload the DPAC approved Vision, Mission, PEOs and POs for AY2025-26 is **31st December 2024**.

BOARD OF STUDIES

(BoS)

Guidelines & Process Flow

JGi JAIN DEEMED-TO-BE UNIVERSITY

BOARD OF STUDIES (BOS) - Guidelines and Process Flow

Introduction

The Board of Studies (BoS) plays a pivotal role in shaping the academic direction and quality of programs within an educational institution. As the primary body responsible for designing, reviewing, and updating curricula, the BoS ensures that the academic offerings remain relevant, comprehensive, and aligned with the institution's vision, industry needs, and regulatory standards. The BoS also plays a key role in fostering collaboration between academia, industry, and other stakeholders, ensuring that graduates are well-prepared for professional success.

In the context of Outcome-Based Education (OBE), the BoS is essential for driving the successful implementation of this learner-centric approach. OBE focuses on clearly defined learning outcomes and aligning teaching methodologies, assessments, and curriculum with these

outcomes. The BoS plays a key role in ensuring that programs are designed to help students achieve the Program Educational Objectives (PEOs), Program Outcomes (POs), and Program Specific Outcomes (PSOs) effectively. Through regular reviews and refinements, the BoS ensures continuous alignment between the desired outcomes and the academic structure, thereby enhancing the overall effectiveness of OBE in fostering meaningful student learning experiences.

This document provides clear and structured guidelines for the formation and functioning of the Board of Studies. It outlines the responsibilities, procedures, and best practices for conducting BoS meetings, facilitating effective curriculum development, and ensuring continuous academic improvement. By following these guidelines, institutions can maintain academic excellence, adapt to emerging trends, and ensure that programs meet both educational standards and the evolving demands of students and industry.

This document serves as a comprehensive resource to guide BoS members in fulfilling their duties effectively, ensuring that the institution remains at the forefront of quality education and successfully adopts the principles of Outcome-Based Education.

JGi JAIN DEEMED-TO-BE UNIVERSITY

I. Composition of the Board of Studies (BoS)

The Board of Studies should have representation from all major stakeholders as enumerated in table 1. *(Note: The composition of the BoS is similar to that of DPAC)*

Table 1: Composition of the Board of Studies (BoS)

	Category	Role in BoS	Number
1	**Dean of Faculty / Director of School***	Chairperson	1
2	**Head of Department**	Co-Chairperson	1
3	**Area Chair / Area Head**	Member	3-8 (Depending on the number of Areas within a Department)

4	**Program Head / Program Coordinator**	Member	3-8 (Depending on the number of Programs offered by the Department)
5	**Senior Non-Teaching Staff** (Academic Administration)	Member	1
6	**Representative of the Office of Academics (OOA) of the University** (To be nominated by CAO)	Internal Invitee	1
7	**Current Student** Preferably from the semesters 4 or higher	Internal Invitee	1-5 (Depending on the number of Programs offered by the department)
8	**Professor**	Internal Invitee	**All Professors**
9	**Associate Professor**	Internal Invitee	**Minimum 2**
10	**Assistant Professor**	Internal Invitee	**Minimum 2**
11	**Quality Assurance Cell Member**	Internal Invitee	1
12	**Industry Expert** With adequate, relevant and credible experience in the domain	External Invitee	3-8 (Depending on the number of Areas / Programs in the Department)
13	**Alumni** Preferably alumni who graduated 5+ years back – which may be relaxed for newer programs	External Invitee	2-3 (Depending on the number of Areas / Programs in the department)
13	**Parent**	External Invitee	1-2

JGi JAIN DEEMED-TO-BE UNIVERSITY

	Academician		
14	Minimum of 15 years of experience in the relevant domain	External Invitee	1-2

** In cases where the Dean of the Faculty position is not occupied, the Directors of the School in which the Department Operates to chair the DPAC*

II. Functions of Board of Studies (BoS)

The Board of Studies is a statutory body at the institute level and reports to the Academic Council and plays a crucial role in shaping academic policies, curriculum design, and quality assurance.

BoS and OBE

Outcome Based Education is a student-centric teaching and learning approach that focuses on measuring student performance based on clearly defined learning outcomes. In the Indian context, Outcome-Based Education (OBE) is particularly important as it addresses the growing need for a more skill-oriented and employability-driven education system. Key regulatory bodies such as the University Grants Commission (UGC), the All India Council for Technical Education (AICTE), and the National Board of Accreditation (NBA) have incorporated OBE into their accreditation and assessment frameworks.

The Board of Studies (BoS) should keep Outcome-Based Education (OBE) at the center stage because it ensures that educational programs are aligned with the evolving needs of both students and the industry. By focusing on well-defined learning outcomes, the BoS can design a curriculum that equips students with the practical skills, knowledge, and competencies required in real-world scenarios, thereby enhancing their employability and readiness for future challenges.

The ***functions of the BoS*** are thus aligned to the requirements of OBE, which typically include:

1. **Academic Planning and Curriculum Design:**
   - Design and periodically revise the curriculum* to ensure it aligns with the desired learning outcomes of each program.
   - Ensure a cohesive learning experience across the curriculum and includes updating course content to meet the evolving needs of industry and society.

   *(*The 'curriculum' refers to curriculum matrix, its structure (core courses, electives etc.) as well as the Course Outcomes (COs) and syllabi of individual courses)*

2. **Teaching, Learning and Evaluation Assessment**
   - Maintains academic standards by setting benchmarks for teaching, assessment, and learning outcomes.
   - Assess pedagogical practices, recommend and approve proposals to changes to the pedagogy (especially structural changes)
   - Assess quality of faculty members and suggest faculty training and development programs.
   - Recommends methods of evaluation and assessment, including exam formats and grading systems
   - Takes student feedback into consideration to improve the learning experience.
   - Suggests enhancements to academic and co-curricular programs for student development.
3. **Continuous Improvement:**
   - Analyze data, identify gaps, and recommend adjustments on the basis of outcome achievement
   - Curriculum to ensure increasing alignment to all program outcomes, with specific focus on outcomes that include empathy, environmental understanding, inclusivity, diversity and societal and economic impact.
4. **Regulatory Compliance:**
   - Ensures that the institution's academic programs comply with guidelines set by accreditation bodies and regulatory authorities

The effective discharge of these functions would help the institution maintain high academic standards and remain relevant to the evolving educational landscape.

JAIN DEEMED-TO-BE UNIVERSITY

III. Academic Planning and Curriculum Design

The guidelines and regulatory requirements laid out in National Education Policy 2020 (NEP), National Credit Framework (NCrF), and Outcome Based Education (OBE) provide the foundational elements for Academic Planning. These guidelines are broadly categorized into:

A) Guidelines and frameworks for Curriculum Matrix (Course Matrix)
B) Guidelines and Frameworks for individual courses - Syllabus

A) Curriculum Matrix (Course Matrix)

The Curriculum Matrix, also known as the Course Matrix, outlines the structure of a program, including:

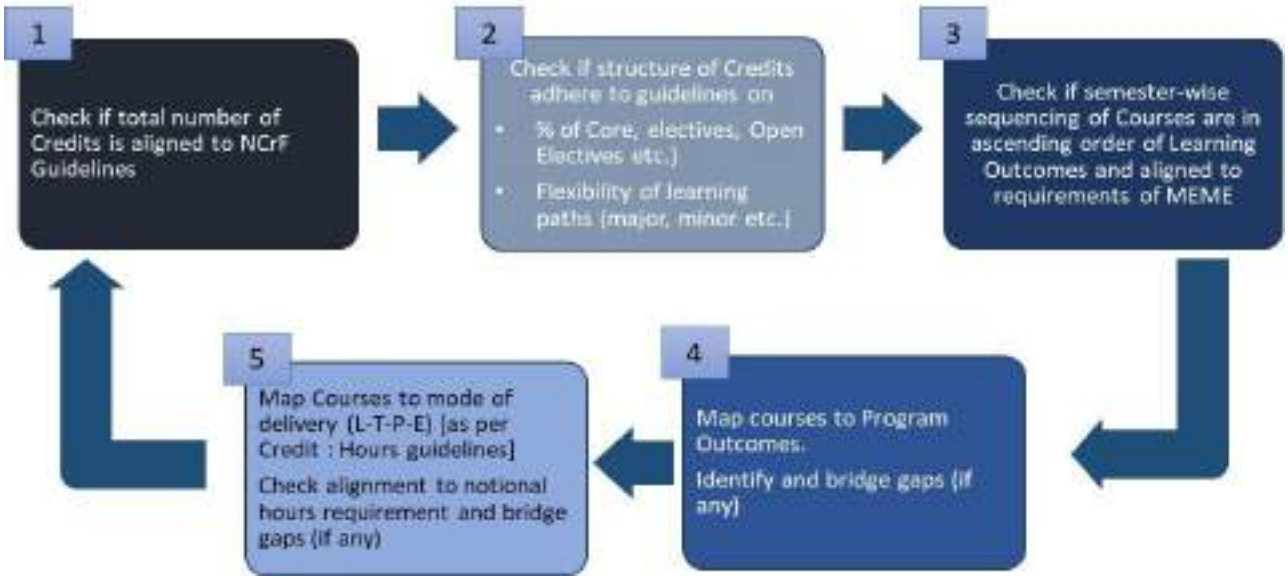
a. List of Courses: Arranged semester-wise.
b. Learning Paths: Specializations, majors, minors, etc.
c. Course Categories: Core courses, discipline-specific electives, open electives, etc.
d. Number of Credits: Allocated to each course.
e. Delivery Mode: Methods such as Lecture-Tutorial-Practical-Experiential.

While the Curriculum Matrix must be designed for any new program, ensuring continuous improvement requires regular analysis and assessment of the Matrix for existing programs before the annual BoS meeting.

The process for evaluating the Curriculum Matrix of an existing program is outlined below. Note that this process is iterative and may require revisiting earlier steps (see Figure 1).

JGi JAIN DEEMED-TO-BE UNIVERSITY

Figure 1: Process for Assessing Curriculum Matrix (Existing Program)



Step 1: Check Total Credits Alignment with NCrF Guidelines

NCrF Guidelines: Mandate a minimum of 40 credits per academic year, translating to 20 credits per semester.

Credit Flexibility: Including internships, project-based learning, and other experiential components, credits per semester may range between 20-24, with a maximum of 46 credits per academic year.

Refer to Table 2 for the total credits range for programs of different duration

Table 2: Total credits to be offered

Duration of Program	No. of Semesters	Total Credits – Min	Total Credits – Max	Credits per Semester
1-year Diploma (PG)	2	40	46	20-23
1-year Master's Degree (PG)	2	40	46	20-23
2 -Year Master's Degree (PG)	4	80	92	20-23
3-Year Bachelor's Degree (UG)	6	120	138	20-23
4-Year Bachelor's Degree with Honors (UG)	8	160	184	20-23

JAIN DEEMED-TO-BE UNIVERSITY

Step 2: Check the Structure of Credits

All courses offered in the curriculum matrix need to be categorized to identify the type of course. The accepted list of course categories and the minimum credit requirements for UG courses is listed in table 3 and in table 4 for PG courses.

Table 3: Course Category and Suggested split of Credits for Undergraduate Programs

	Category of the Course	3-Year UG Min Credits	4-Year UG Min Credits	Remarks
1	**Core courses**: Courses which are a part of the discipline to which the program belongs and contribute to a "**Major**".	Major: 60	Major: 80	
	Discipline Specific Electives: Courses which are a part of the discipline to which the program belongs and are provided under the **choice-based credit system** and contribute towards a **'Major' or a 'Minor'**.	Minor: 24	Minor: 32	Upto 50% of these could be from Skill Based Courses
2	**Multi-Disciplinary Courses or Open Electives**: Courses which are **outside the discipline** to which the program belongs.	09	09	
3	**Ability Enhancement Course:** Courses that lead to ability enhancement of communication through Modern Indian Languages and English.	08	08	The option is to create Language courses that are specific to your program (e.g. Communication in Business, English for Scientific Inquiry) OR basic languages.
4	**Skill Enhancement Course**: Courses that contribute to Employability skills / soft skills / life skills.	09	09	● In case the SEC is related to your discipline – it could add up to the 60/80 credits of major or

JAIN DEEMED-TO-BE UNIVERSITY

	(TD-PCL is SEC course mandated across all programs)			to the 24/32 credits of minor. ● SEC courses offered outside of the discipline should not be included for major / minor credit calculation. ● Min. credits for TD-PCL is 9.
5	**Value Added Course (common for all UG)**: Courses that are mandated across UG courses, e.g. Health, Wellness and Mind-Management, Indian Constitution, Environmental Sciences, Ethical and Human Values.	06	06	Mandatory only for UG. Optional for PG
6	**Internship:** Including Internships, Apprenticeship, Community Engagement and service, Field-based major/ minor projects	03	03	In case the Internship is related to your discipline – it could add up to the 60/80 credits of major or to the 24/32 credits of minor.
7	**Research Projects / Dissertation**	-	12	● Optional for 3-Year UG Program ● Compulsory for 4-Year UG Programs (in the fourth year)
	Total	120	160	

Details in the CCFUP document: *https://www.ugc.gov.in/pdfnews/7193743_FYUGP.pdf*

These are minimum credit requirements for each category. Programs may extend this (refer table 2 for the maximum number of credits)

JAIN DEEMED-TO-BE UNIVERSITY

Table 4: Course Category and Suggested split of Credits for Post-Graduate Programs				
	Category of Course	**1-Year PG Min Credits**	**2-Year PG Min Credits**	**Remarks**
1	**Core courses**: Courses which are a part of the discipline to which the program belongs and contribute to a "**Major**"	20	40	
	Discipline Specific Electives (DSE): Courses which are a part of the discipline to which the program belongs and are provided under the **choice-based credit system** and contribute towards a **'Major' or a 'Minor'**.	08	16	Up to 50% of these could be from Skill Based Courses
2	**Multi-Disciplinary Courses or Open Electives**: Courses which are **outside the discipline** to which the program belongs.	03	06	
3	**Skill Enhancement Course (SEC)**: Courses that contribute to Employability skills / soft skills / life skills. **(TD-PCL is SEC course mandated across all programs**	06	09	● In case the SEC is related to your discipline – it could add up to the 20/40 credits of major or to the 24/32 credits of minor. ● SEC courses offered outside of the discipline should not be included for major / minor credit calculation ● Min. credits for TD-PCL is 6
4	**Internship:** Including Internships, Apprenticeship, Community Engagement and service, Field-based major/ minor projects	-	03	In case the Internship is related to your discipline – it could add up to the 60/80 credits of major or to the 24/32 credits of minor.
5	**Research Projects / Dissertation**	03	06	
	Total	40	80	

- These are minimum credit requirements for each category. Programs may extend this (refer table 2 for the maximum number of credits)

JAIN DEEMED-TO-BE UNIVERSITY

Step 3: Check the sequencing of courses to align with Multiple Entry – Multiple Exit (MEME) requirements

The multiple entry and multiple exit options for students is facilitated at the undergraduate and postgraduate level.

- The entry / exit will be facilitated by credit accumulation through the facility created by the "Academic Bank of Credits" (ABC) in which students across the country would create an ID (accounts) to accumulate, consolidate and transfer the credits earned by them by undergoing courses in any of the HEIs.
- The ABC allows for credit accumulation and redemption for the purpose of fulfilling the credits requirements for the award of certificate/ diploma/degree by the authorized HEIs. Upon collecting a certificate, diploma or degree, all the credits earned till then, in respect of that certificate, diploma or degree, shall stand debited and deleted from the account concerned.
- HEIs offering programs with the multiple entry and exit system need to register in the ABC to enable acceptance of multidisciplinary courses, credit transfer, and credit acceptance. (Note: The credit acceptance is subject to approvals from the University's equivalence committee.)

(refer to the following link for details of NCrF)

https://www.ugc.gov.in/pdfnews/9028476_Report-of-National-Credit-Framework.pdf

- The NCrF credit level, type of qualification awarded and requirements in each year in given in table 5

Table 5: UG - MEME (year-wise breakup)

Sl. No.	Parameters	Year 1	Year 2	Year 3	Year 4
1	Min. Credits as per UGC	40	80	120	160
2	Additional Credits required to exit as per UGC (Vocational / Internship / Projects)	04	04	--	--
3	NCrF (Credit Levels)	4.5	5.0	5.5	6.0

4	Academic Level	Under Graduate Certificate	Under Graduate Diploma	Bachelor's Degree	Bachelor's Degree (Honours / Research) / Engineering
5	Experiential Learning Proficiency *				
6	Program Outcomes				
7	Skill Competencies acquired				
8	Possible Job Roles				

** Experiential Learning Proficiency: Trained / Proficient / Expert / Master*

*** Sl. No. 5-7 to be mapped by the Departments*

Step 4: Map Courses to Program Outcomes (POs)

***4.1.* Initial Mapping:** At JAIN, courses are broadly mapped to the Program Outcomes as a first step (Important Note: This is a broad-level planning activity. Detailed Course Outcome-Program Outcome (CO-PO) mapping is conducted after the Curriculum Matrix passes all checks).

(A sample of the Course to PO mapping for a particular semester is provided in figure 2 and the format for the mapping in Annexure 1)

JGI JAIN DEEMED-TO-BE UNIVERSITY

Figure 2: Sample screenshot of Course to PO mapping

Sample : Mapping POs to Program Curriculum

Semester-2

	Title of the Course	Category of the Course	Credit Units	PO1	PO2	PO3	PO4	PO5	PO6	PO7
01	Operations Research	Core Course	3	-	L	L	H	H	-	L
02	Consumer Behaviour and Insights	Discipline Hard Core	3	L	-	M	H	M	L	-
03	Customer Centricity and CRM	Discipline Hard Core	3	H	M	-	H	-	H	M
04	Sales Management	Discipline Hard Core	3	H	M	-	M	H	H	M
05	Marketing in the Digital World	Discipline Specific Elective	3	H	-	H	L	M	H	-
	Marketing of Technology Products and Services			H	H	-	-	L	H	H
06	Email, Mobile and Lead Generation Strategies	Discipline Specific Elective	3	H	M	-	L	M	H	M
	Omni Channel Marketing			M	H	-	L	H	M	H
07	As per University Recommendations	Open Elective	3							
08	Digital marketing for sales professionals	Skill Enhancement Course	2	-	L	L	H	H	-	L
09	PCL - 1	Project Centric Learning 1	3	L	-	M	H	M	L	-
	Total Credits		26							

4.2. **Map courses to Program Outcomes:** Sum the number of "high" mapping courses across all semesters for each PO.

(A sample is given below in figure 3 and the format for adding it up in Annexure 1)

Figure 3: Sample screenshot of No. of High Mapping courses to POs

Sample : Mapping POs to Program Curriculum

No. of Courses Mapped Highly to each PO

1st to 4th Sem		High*
PO1	Apply knowledge of management theories and practices to address and resolve business challenges	30
PO2	Demonstrate analytical and critical thinking abilities for information-based decision making	13
PO3	Analyse global, economic, legal and ethical aspects of business	26
PO4	Apply trans-disciplinary tools and techniques towards effective problem solving	22
PO5	Assist others and self in accomplishing organizational objectives and contribute effectively to a collaborative team setting.	28
PO6	Exhibit an entrepreneurial mindset for the establishment of sustainable businesses and societies.	26
PO7	Exemplify value-based leadership for excellence	15

* *This is for illustration only*

4.3. Gap Analysis: Analyze whether each PO has an adequate number of courses mapped to it at a high level. Identify and bridge any gaps

Step 5: **Map courses to Delivery Mode (L-T-P-E)**

- **NCrF Guidelines:** Mandate the delivery of 1200 'notional hours' per academic year. These notional hours are a combination of Lecture (L), Tutorial (T), Practical (P), and Experiential (E) learning.
- **Credit-Hour Relationships:**
    - 1 Credit = 15 hours of teaching (L or T) or 30 hours of internship/practical work/fieldwork, or 45 hours of experiential learning over 15 weeks.
    - For Apprenticeships/Internships, 3 months = 10 credits.

(Refer to figure 4 for sample course matrix and the format for filling the course matrix in Annexure 2. The format has also been saved and shared as an excel file, where checks have been built to account for the L-T-P-E ratios).

Figure 4: Sample Course Matrix

Name of Program	
Learning Path (Major, Minor, Specialization)	

							Hours Per Week			
Course Code	Course Name	Course Category	Semester	CA	ESE	Credits	L (only in multiples of 1)	T (only in multiples of 1)	P (only in multiples of 2)	E (only in multiples of 3)
23MBACC101	AA	Core Course	1	50	50	3	1	0	2	3
23MBACC102	AB	Core Course	1	50	50	3	2	1	0	0
23MBACC103	AC	Core Course	1	50	50	3	3	0	0	0
23MBACC104	AD	Core Course	1	50	50	3	3	0	0	0
23MBACC105	AE	Core Course	1	50	50	3	2	0	0	3
23MBACC106	AF	Core Course	1	50	50	3	1	0	4	0
23MBAOE107	AG	Open Elective	1	50	50	3	3	0	0	0
23MBASE108	AH	Skill Enhancement Course	1	50	50	2	0	0	2	3
23MBASE109	AI	Skill Enhancement Course	1	50	50	2	0	0	2	3
23MBATP109	AJ	TD - PCL	1	100		3	0	1	2	3

JGU JAIN DEEMED-TO-BE UNIVERSITY

5.1 Analyze the Course Matrix:

- Ensure notional hours add up to 1200 hours per academic year.
- Verify that credits to learning hours' ratios are appropriately aligned.

5.2 Bridge Identified Gaps: Address any discrepancies in the notional hours or credit-hour alignment.

B) Individual Courses – Course Outcomes and Syllabus

To maintain relevance and effectiveness, all Course Coordinators should assess individual courses within the Curriculum Matrix.

Course Outcomes Checklist:

- **Alignment:** Course Outcomes must align with the expected learning outcomes of the semester in which the course is offered.

- **Technical Accuracy:** Ensure the technical correctness of the Course Outcomes (refer to the OBE manual).
- **PO Contribution:** The articulation of a PO, as calculated through CO-PO mapping, should contribute significantly (articulation >=2) to at least 40% of the POs.
- **Industry Relevance:** Evaluate the industry relevance of the Course Outcomes.
- **Alignment to SDGs:** It is recommended that the a minimum of one Course Outcome in every course is aligned to one or more SDGs (Sustainable Development Goals). https://sdgs.un.org/goals

Modification Consideration: Adjust Course Outcomes if one or more points from this checklist are not met.

Syllabus Checklist:

- **Coverage:** Ensure the syllabus adequately covers the Course Outcomes.
- **Updates:** Update the syllabus according to the latest industry requirements.
- **Relevance:** Include topics from the latest books or research papers on the subject.

Modification Consideration: Revise the syllabus if any of the above points are not checked. **(Note:** If proposed revisions to the syllabus exceed 30%, propose it as a new course rather than a modification).

JAIN DEEMED-TO-BE UNIVERSITY

IV. Teaching, Learning and Evaluation

i. Student Experience

The BoS plays a crucial role in continuously improving the student experience. To facilitate this, it is recommended that the BoS be provided with:

- **Analysis of Students' Feedback on Faculty:** An in-depth review of student feedback regarding teaching quality, faculty engagement, and overall instructional effectiveness.
- **Analysis of Students' Feedback on Institutional Processes:** Evaluation of feedback on institutional infrastructure, placement services, program outcomes, and other critical aspects that influence the overall student experience.

ii. Innovative Pedagogies and Structural Changes to Pedagogy

To foster innovation in teaching and learning, it is essential to invite comments, inputs, and approval from the BoS on the introduction of new pedagogical approaches. To support this:

- **Data on Previous Pedagogical Innovations:** Present data on the effectiveness of innovative pedagogies implemented in previous semesters, focusing on their impact on student performance, employment readiness, and the attainment of stated outcomes.

For proposals involving major structural changes to program delivery and pedagogy, such as transitioning to a modular approach within a semester, it is recommended to provide the BoS with:

- **Challenges with the Current System:** A clear articulation of the issues within the existing system that necessitate change.
- **Proposed Solutions:** A detailed description of how the new system will address these challenges and improve the learning experience.

If the new system is proposed to create new opportunities, present:

- **Opportunities and Expected Outcomes:** A description of the opportunities that the changes would create and the expected positive outcomes.

JGi JAIN DEEMED-TO-BE UNIVERSITY

iii. Assessment and Evaluation

To ensure that assessment methods are fair, consistent, and aligned with learning objectives, the BoS is expected to review the quality and relevance of examination papers, assignments, and other assessment tools. The review should focus on:

- **Standardization of Grading Rubrics and Evaluation Criteria:** Ensure consistency and fairness across different courses.
- **Alignment with Course Outcomes:** Check that assessments are effectively measuring the stated Course Outcomes, ensuring that they are relevant and support the overall learning objectives.

V. Regulatory Compliance

The BoS is tasked with reviewing the institution's rankings and ratings as assessed by regulatory and accreditation bodies. This review includes identifying areas where the institution may be underperforming, analyzing the underlying factors, and recommending targeted action points to enhance the institution's standing in these evaluations.

VI. Archiving and Filing

The BoS documents (Curriculum matrix, Detailed Syllabus, Minutes of the Meeting etc.) will have to be archived at the campus as well as in the central University repository. The files will have to be saved in following nomenclature:

1. Year of BoS
2. Program Name
3. Learning Path name (Major, Minor, Specialization)
4. Description of the document
5. Version (Draft, Final, Approved)

E.g. The Approved version of 2025 curriculum matrix of MSc Forensic Science with a Major in Digital Forensics and Information Security will be named as:
25MSc Forensic Science in Digital Forensics and Information Security Curriculum Matrix Approved.doc

Invitation letter for Board of Studies Meeting

Dear <Name of External Invitee>,

Greetings from JAIN (Deemed-to-be University).

It is our great honour and pleasure to invite you to attend the **Board of Studies for the <Department Name> <Faculty Name> at the <School/ Campus>.** Your presence and valuable insights would greatly contribute to the continuous improvement and academic enrichment of our programs.

This BoS is scheduled on <Day, Date, Time and Venue>.

<Brief write-up on the University & Department>.

As you would be aware, the Boards of Studies (BoS) play a crucial role in shaping the academic experience for students and ensuring the quality of educational offerings and maintaining academic excellence and relevance. Boards of Studies are critical foundations to integrate necessary industry insights and exemplary practices that define our learning ethos.

In this regard, we are continuously working on our curriculum by seeking guidance of experts in bringing real world practices and experiences into the class rooms and also augmenting the faculty resources.

Your expertise and guidance play a crucial role in shaping our programs and aligning them with the latest trends in commerce and industry.

In this regard, we keenly look forward to receiving your valued inputs on our Program Design, Curriculum Matrix, Course Syllabus, Learning Experience, Teaching Methodology and Assessments.

Program Agenda

Time allotted	Particulars
05 minutes	● Welcome by the BoS Convener
15 minutes	● A brief about JAIN University' Vision and significant achievements of the year by Principal Officer from the University or Director/Dean of the Department
10 minutes	● Introduction of the BoS members ● Sharing the Department vision and mission By Head of the Department as guided by Director/ Dean

3 hours (30 minutes per program)	**Part A: Program Design, Curriculum Matrix & Course Syllabus** (to be shared 05 days prior to the BoS) 1. Course matrix (semester wise course flow, suggestions on adding new courses, sequencing of courses, evaluation of redundant courses) 2. Course matrix in alignment with Industry 5.0 requirements (interdisciplinary courses, suggestions on course syllabus) 3. Any other points for discussion
1.5 hours (15 minutes per program)	**Part B: Learning Experience** 1. Indications on learning methodologies for improving outcomes – making learning more experiential, application based etc. 2. Involvement of Industry for research and teaching collaboration and for Knowledge/ Tech transfer 3. Explore potential tie-ups for adding value through research, incubation of ideas, innovative practises, consulting, internship, projects etc.
1.5 hours (15 minutes per program)	**Part C: Assessment and Evaluation** 1. Incorporate suggestions on learning evidence and measurement of competencies as part of the assessment process. 2. Strengthen assessment tools and evaluation schema by incorporating portfolio based/ new-age assessment designs 3. Overview of evaluation schema and readiness of graduates for the world of work
20 minutes	● Closing remarks from the members ● Summary of Action points by designated Faculty member
10 minutes	● Felicitation and Thanks by Head of the Department

Please confirm your attendance by replying to this email at <email address>.

We look forward to welcoming you to this meeting and are eager to benefit from your esteemed guidance.

Best regards,

Director/Dean/HoD
